Manager, Application Services Manager

Alberta Finance and Enterprise, Edmonton - In these uncertain economic times, one thing you can count on is that government will continue to collect taxes. If you would like a challenging position in a secure, ever changing and exciting IT environment, read on!

Tax and Revenue Administration (TRA), a division of Finance and Enterprise has the responsibility to administer tax, revenue, and related benefit programs. **Business Technology Management**, a branch within TRA, has the lead responsibility for managing information technology operations for the division including some project planning activities, resource management, application and data architecture, development and maintenance of IT systems, product development, project/change management and cross-government IT coordination. We are looking for an innovative and experienced individual to fill an important position in the Business Technology Management Branch. The successful applicant will manage a team of System Analysts who provide application development and maintenance services to the organization. This manager will work with project managers, business analysts, system analysts, and various stakeholders to:

- Develop, maintain, and implement system changes as required by new and updated tax legislation and various strategic initiatives.
- Develop systems that meet the business requirements of the organization.
- Consult with senior and executive management teams to plan and develop the strategic direction for TRA's IT applications.
- Manage the core IT assets of data, systems, software, and people within the application services area.

You will share responsibility for planning, executing, monitoring, and controlling TRA's application (software) releases with one other manager.

Your background includes extensive experience in application development and maintenance in a complex IT environment that included technologies from Oracle and Microsoft. This experience has developed your strong analytical capabilities, excellent written and verbal communications skills, as well as the ability to develop and maintain excellent working relationships with internal staff and IT contractors.

Qualifications: University degree in a relevant discipline (such as computer science, computer engineering, electronics/electrical engineering, business admin with a major in information systems) is required along with extensive, progressively responsible experience in application development and maintenance, systems architecture, and Oracle and Java development software. Experience with Microsoft .Net would also be an asset. Management training along with experience in resource allocation would be an asset. Equivalencies will be considered.

NOTE: Final Candidates for this position will be asked to undergo a security screening. This competition may be used to fill future vacancies.
